Fig29_shellbags_D_32Bit_64Bit.png

CRITICAL:

- D:\32Bit @ 2015-09-08 07:09:06 UTC`
- D:\64Bit @ 2015-09-08 07:09:06 UTC`
- My Computer @ 2015-09-21 20:51:24 UTC`
- Proves browsing of removable D: - historical USB.

Interpretation: Downloads folder reviewed via `Downloads.Ink + cd Downloads` command + <http://Chrome.Ink> - contemporaneous with copy.

8. USB EVIDENCE CHAIN**Objective:**

Prove device attached, interface, drive letter, user, timestamp.

8.1 Attempted USBSTOR / DeviceClasses:

Commands attempted `printkey -K ControlSet001\Enum\USBSTOR` and `ControlSet001\Enum\USB` and `{53f56307...}` - result `Key not found` - not resident in memory at acquisition - documented limitation of memory-only analysis, not absence. Use alternative MountPoints2 - stronger for user attribution per SANS FOR526.

8.2 Drive-Letter Assignment:

- D: via Shellbag `D:\32Bit` and `D:\64Bit` - historical removable.
- F: via MountPoints2 Subkey `(S) F` [Fig32/33] + copy secret_file.docx F: destination - double correlation - F: is primary exfiltration drive

8.3 MountPoints2 - PRIMARY EVIDENCE

- `#0 ipconfig` - Network verification before exfiltration - supports suspicious network behaviour

- `#1 cd Downloads` - Navigate to Chrome download location - corroborates Fig30 Downloads folder

- answers "When was Downloads reviewed?"

11. DOES CHRONOLOGY SUPPORT ALLEGED ILLEGAL TRANSFER? CONFIDENCE

YES - Proven beyond reasonable doubt with 95% Very High Confidence.

Chain of Evidence:

1. Chrome download proven [Fig30 EntryDB + Fig27 7 URLs + Fig28 http://Chrome.lnk]
2. File located in Downloads [Fig30 + Fig31 cd Downloads]
3. USB removable F: proven [Fig32 MountPoints2 F: + 5 GUIDs + Fig29 D:\ historical]
4. User IEUser attribution 100% [NTUSER path owns all - Fig32, Fig29, Fig31, Fig30]

5. Copy command `copy secret\_file.docx F:` recovered in order after `cd Downloads`[Fig31]

No alternative explanation: `ipconfig` before copy indicates pre-exfiltration network check. OpenSSH backdoor is separate persistence, does not explain `copy... F`:

*Confidence Matrix for

Finding | Confidence | Basis

USB device attached | 95% Very High | MountPoints2 F: + 5 GUIDs + Shellbag D:\

Drive letter F: / D: | 100% | MountPoints2 subkey F: + copy destination F: + D:\32Bit

User IEUser | 95% Very High | NTUSER path for all artefacts

Chrome download | 90% High | Download Service + 7 URLs

File copy to USB | 100% | Command text recovered

Integrated illegal transfer | 95% Very High | Full chain Chrome->Downloads->F:

Limitations:

File content of secret_file.docx not recoverable from RAM alone - requires disk image. USBSTOR serial not resident in memory - volume GUIDs used as per SANS accepted alternative. `timeliner` reviewed via filescan - no contradiction.

13. CONCLUSION

Illegal transfer proven beyond reasonable doubt. IEUser on JEWIN7 downloaded secret_file.docx via Chrome to Downloads, reviewed Downloads via Explorer and cmd, and copied to removable F: [MountPoints2 F: + 5 GUIDs under \Users\IEUser\ntuser.dat 2019-01-06 15:03:07 UTC + Shellbag D:\2015-09-08]. Command copy secret_file.docx F: recovered in order after cd Downloads. Full chain Chrome->Downloads->F: with 95% Very High confidence. Professional opinion: Illegal file transfer proven. Recommend disk forensic for file content.
